PROFILE

Software developer working across frontend, backend and integrations for business applications. I build interfaces, implement API and business logic, investigate issues and verify changes with the team. Open to frontend, backend and full-stack roles, with an interest in useful products across different industries.

TECHNICAL SKILLS

Application development: React, JavaScript, TypeScript, Python, Django, Node.js, NestJS, REST, GraphQL.

Data & integration: SQL, PostgreSQL, MySQL, Redis, API integration and background jobs; foundational familiarity with MongoDB and microservices.

Delivery: Git, Docker and CI/CD workflows; working familiarity with Kubernetes and Jenkins, and fundamentals of Nginx and SFTP.

EXPERIENCE

Madison Technologies | Backend Developer

February 2024 - Present

- Develop and maintain backend features, APIs, integrations and background processing for business and customer-facing applications.
- Investigate reported issues, clarify business requirements and implement scoped fixes with verification of affected workflows.
- Collaborate with teammates on testing, code changes and release preparation.

SELECTED PROFESSIONAL CONTRIBUTIONS

Enterprise management software | Frontend & backend

- Build and improve user interfaces, connect API interactions and implement business logic across both sides of the application.
- Improve responsive behavior and test user journeys from interface interactions through backend processing.

Customer services & operations tools | Backend

- Contribute to service features, notifications, reporting and maintenance; investigate failures and verify changes with the team.

Client work is described at a high level. Names, internal implementation details and non-public metrics are intentionally omitted.

PERSONAL PROJECT

SignBridge | Learning & accessibility

- Develop a React/TypeScript learning interface with lessons, a dictionary and practice tools; explore camera-based recognition and Python service integration.

Recognition remains experimental, not a validated continuous sign-language translator.

EDUCATION & LANGUAGES

Duy Tan University | Bachelor of Information Technology | 2019 - 2023

Vietnamese; English for technical documentation and workplace communication.
